

AESTHETIC BREAST SURGERY

FEATURING JONATHAN H. SHERWYN, MD, FACS
CERTIFIED AMERICAN BOARD OF PLASTIC SURGERY

CBS TV's May 2014 *American Health Front* program interviewed Jonathan H. Sherwyn, MD, FACS to learn about his successful approach to breast enhancement surgery that has helped women achieve beautiful, natural looking breasts.

Aesthetic Breast Enhancement

It is not uncommon for women to be unhappy with the size, shape and appearance of their breasts especially as they change over time. Breast enhancement surgery has evolved to include advanced techniques that allow skilled and experienced surgeons to create natural looking breasts that conform to each patient's individual idea of breast aesthetics.

Confidential Consultation

Superior outcomes start with a lengthy, in-office, confidential consultation with Dr. Sherwyn to discuss and fully understand any physical and emotional concerns a patient may have. Aesthetic

treatment options are fully discussed as are the pre and postoperative visits needed to restore breasts to the size, shape and proportion desired.

Individual Treatment Plans

A personalized treatment plan is created by Dr. Sherwyn to conform to each patient's individual idea of breast beauty. Plans focus on the most appropriate surgical technique needed to successfully achieve natural looking aesthetic goals.

Breast Aesthetics

Natural looking, well proportioned breasts result from Dr. Sherwyn's grasp of breast aesthetics and his experience with the newest enhancement techniques. These include breast lifts such as the commonly known "lollipop" procedure for a "champagne cup" look and the tailor-tack uplift known for its accuracy and precision.
