Text follows path of ASPS member's patient

Jonathan Hilton Sherwyn, MD, New York, served as an expert in a recently published book, entitled *Looking Good at Any Age*. The book follows the path to rejuvenation of one of Dr. Sherwyn's patients, a 50-year-old woman who wanted to transform her face into a youthful vision of herself. "The surgery was the most precise I had ever seen," said author Amy Newbuger, MD, in the book. "He was so careful, so complete and so respectful of her deepest desires."
